## Profile

Highly motivated and detail-oriented **BCA student** with a solid foundation in computer applications and programming languages. Proficient in **software development, database management, and web technologies**, with hands-on experience in real-world projects.

Demonstrates **strong problem-solving abilities** and a quick learning curve when introduced to new concepts or technologies. Possesses excellent **teamwork and communication skills**, enabling smooth collaboration in dynamic environments.

Driven by a passion for technology and **continuous learning**, with a strong commitment to contributing to team success through hard work, attention to detail, and exceptional organizational skills.

## Education

2022 – 2025      **Bachelor of Computer Application**  
Savitribai Phule Pune University

## Skills

Programming Languages: C, C++, Java, Python	● ● ● ● ●	Web Technologies: HTML, CSS, JavaScript, Bootstrap, AJAX, XML	● ● ● ● ●
Frameworks: React.js, Node.js, Express.js, Spring Boot	● ● ● ● ●	Database Management: SQL Server, MySQL	● ● ● ● ●
Development Tools: Git, VS Code, Eclipse	● ● ● ● ●	Soft Skills: Problem-Solving, Teamwork, Time Management, Communication, Critical Thinking	● ● ● ● ●

## Languages

- English
- Hindi
- Gujarati
- Marathi

## Projects

2024 – 2024	<b>Online Medicine Ordering System</b> <i>Technologies: HTML, CSS, JavaScript, PHP, MySQL</i> An <b>Online Medicine Ordering System</b> is a digital platform for ordering prescription and over-the-counter medicines from home. It simplifies the process through features like home delivery and prescription management. Users gain easy access to a wide range of pharmaceutical products with convenience and efficiency.
2024 – 2025	<b>Online RTO Management System</b> <i>Technologies: HTML, CSS, JavaScript, PHP, MySQL</i> Developed an <b>Online RTO Management System</b> using HTML, CSS, JavaScript, PHP, and MySQL. The system enables users to apply for LLR, DL, and vehicle registration, check the status of their applications, and print approved documents.

This project streamlines the process, enhancing user experience with a smooth, automated workflow for managing RTO-related tasks efficiently.

2024 – 2025

**Online Crime Reporting System**

*Technologies: React.js, BootStrap, PHP, MySQL*

The Online Crime Reporting System is a digital platform designed to streamline the process of reporting crimes. It enables citizens to file complaints, track case status, and interact with law enforcement from anywhere, anytime. The system enhances transparency, reduces paperwork, and improves the efficiency of crime investigation and resolution.
